

Barem Inginerie Software	
Livrabil Intermediar	
General requirements	
	Some deliverable items are not on the GitHub repository
	All deliverable items are not on the GitHub repository
	Artefact is not timestamped
Problem Statement sau Product Vision	
	Clear definition of Problem Statement/Product vision
Product features and functionalities	
	The list of product features and functionalities that deliver value to the stakeholders, aligned with the product vision/problem statement, presented in any form (tabular, diagram, mindmap)
	Present features/functionalities in a structured, organized form
	Highlighting the features/functionalities already delivered, the ones planned for delivery during this course/project, the ones for the future releases (the same presentation form can be used: tabular, diagram, mindmap)
	Define product roadmap for next and future releases
	Identify integration points
Non-functional requirements	
	Identify NFRs
	SMART definition of the NFRs
Customer Journey	
	Create 1-2 User Personas
	Create one User Journey Map
Activity Diagram or State Diagram	
	The diagram is incomplete (covers very few activities of the flow/states of the object) and/or mostly incorrect (is not logical and incorrectly uses the UML notations)
	The diagram is almost complete (covers most of the activities of the flow/states of the object) and/or mostly correct (is logical and correctly uses the UML notations)
	The diagram is complete (covers all activities of the flow/states of the object) and correct (is logical and uses correctly the UML notations)
A set of User Stories	
	Define user stories that add up to the time resources available
	Correctly define User Stories (using the US `language`)
	Define Acceptance Criteria (using Gherkin Syntax) for the stories in scope of the first development sprint
Prioritized Product Backlog	
	Define backlog issues (development tasks, user stories) for the first development sprint
	Development tasks are correlated with User Stories
	Backlog issues are estimated
